Technology Center 2600

Dear Sir:

In response to the Office Action dated March 13, 2002, Applicant submits the following response.

IN THE SPECIFICATION

Please replace the paragraph beginning on line 15 of page 7 with the following paragraph.

The selectable video clock source 202 includes a multiplexer which serves as a programmable switch to provide switching between a plurality of display-dependent clock signals 204a and 208b. These signals are display-dependent since they may vary depending upon which display is selected to display the overlaid video. For example, if a selected display has a higher refresh rate than another display, the clock signals 204a and 208b may be different, and as such the single video clock signal is switched to be equal to one of the differing clocks 204a and 208b.
